Very early variety with an **excellent production potential** for such an early maturity

-

Flowering time is semi-early.

-

The fruits are attractive and feature an **excellent eating quality**

-

**Easy to train and shape**

-

Vigorous variety which produces strong flowering shoots leading to **large size fruits**

Fruit description

Round,regular, slightly flatened.The luminous attractive skin colour varies from dark red to dark pink.

The skin has very little fuzz. The stone is of medium size, semi-freestone.
Firmness is good, the fruit has a good behavior when handled. The-flesh is creamy white, without any red lining around the stone. The fruit flavour is mild, with strong aromas, sweet with a hint of enhancing acidity. The texture is creamy and very juicy.

Production

In good production conditions, the yield can reach **25T/Ha**
The dominant fruit size is **A**, with an average weight of **150 -160 g**

B 25%
AA 25%
A 50%

Fruits at harvest time

	LOW	MEDIUM		HIGH

✿ Blooming

- **Bud break :** season
- **Period :** semi-early— PATTY® + 3 days
- **Bloom set :** good
- **Fruit setting :** good
- **Thinning :** medium

🌳 Tree

- **Habit :** Semi erected
- **Vigor :** strong
- **Wood qualities :** good

- **Shape pruning :** necessary during the 1st and 2nd leaf stages, to ensure the proper spreading of the scaffold branches.
.
- **Regular pruning :** must be done on flowering shoots, which usually are of good quality.

- **Summer pruning :** post harvest pruning is recommanded to encourage strong flowering shoots for the following year. It will improve the fruit yield and size .

- **Productivity :** very good for such an early variety
- **Fruit set :** rapid

⦾ Fruit characteristics

- **Split cores susceptibility :** weak
- **Rot susceptibility :** weak
- **Sensitivity to handling :** weak
