

ALASKA COV

Tree

Vigor
High

Habit
Intermediatete

Ramification
Balanced

Productivity
High

Resistance to diseases
Intermediate

Fruit

Hardness of shell
Soft

Percentage of kernel (%)
With the whole shell
53
Only with the inner shell
62

Kernel weight (g)
1.2

Kernel shape
Amygdaloid

Double seeds (%)
2

Ripening time
Intermediate

Flowering

Flower density
High

Blooming time
Extra-late

Self-compatibility
Yes

Self-fertility
High

Chemical composition

Fiber (%)
6

Proteins (%)
20

Fat (%)
60

Sucrose (%)
5

Esterols (mg/100g)
315

Unsaturated / Saturated fats index (%)
11

Oleic / linoleic acids index (%)
4
