

FLORIDA COV

Tree

Vigor
Very high

Habit
Balanced

Ramification
Balanced

Productivity
High

Resistance to diseases
Intermediate

Fruit

Hardness of shell
Soft

Percentage of kernel (%)

With the whole shell
48

Only with the inner shell
61

Kernel weight (g)
1.4

Kernel shape
Amygdaloid

Double seeds (%)
2

Ripening time
Very early

Flowering

Flower density
High

Blooming time
Early

Self-compatibility
Yes

Self-fertility
High

Chemical composition

Fiber (%)
10

Proteins (%)
22

Fat (%)
55

Sucrose (%)
5.4

Esterols (mg/100g)
311

Unsaturated / Saturated fats index (%)
12

Oleic / linoleic acids index (%)
4
